/ikfast.h

```
graph TD; A["tesseract_kinematics<br>/ikfast/include/tesseract<br>_kinematics/ikfast/external<br>/ikfast.h"] --> B["vector"]; A --> C["list"]; A --> D["stdexcept"]; A --> E["cassert"];
```

The diagram illustrates the header file structure for Tesseract's IKFast module. A central box represents the main header file, which includes four standard C++ headers: <vector>, <list>, <stdexcept>, and <cassert>. Arrows point from the central box to each of these four header boxes, indicating the inclusion relationship.
