

tesseract_scene_graph
::StateSolver

```
graph BT; KDL[tesseract_scene_graph::KDLStateSolver] --> State[tesseract_scene_graph::StateSolver];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a gray-shaded box representing the base class, `tesseract_scene_graph::KDLStateSolver`. A blue arrow points vertically upwards from this box to a white box at the top, which represents the derived class, `tesseract_scene_graph::StateSolver`. Both boxes have a black border and contain their respective class names in two lines.
