

tesseract_scene_graph
::StateSolver

```
graph BT; KDL[tesseract_scene_graph::KDLStateSolver] --> State[tesseract_scene_graph::StateSolver];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a gray-shaded box containing the text 'tesseract_scene_graph::KDLStateSolver'. A blue arrow points vertically upwards from this box to a white box at the top containing the text 'tesseract_scene_graph::StateSolver'. This indicates that 'tesseract_scene_graph::KDLStateSolver' inherits from 'tesseract_scene_graph::StateSolver'.
