

tesseract\_collision  
::ConvexDecomposition

```
graph BT; A["tesseract_collision::ConvexDecompositionVHACD"] --> B["tesseract_collision::ConvexDecomposition"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray-shaded box representing the base class, `tesseract_collision::ConvexDecompositionVHACD`. A blue arrow points vertically from this box to a white box above it, representing the derived class, `tesseract_collision::ConvexDecomposition`. Both boxes have a black border and contain their respective class names on two lines.
